

SDL Developer Portal Registration Guide

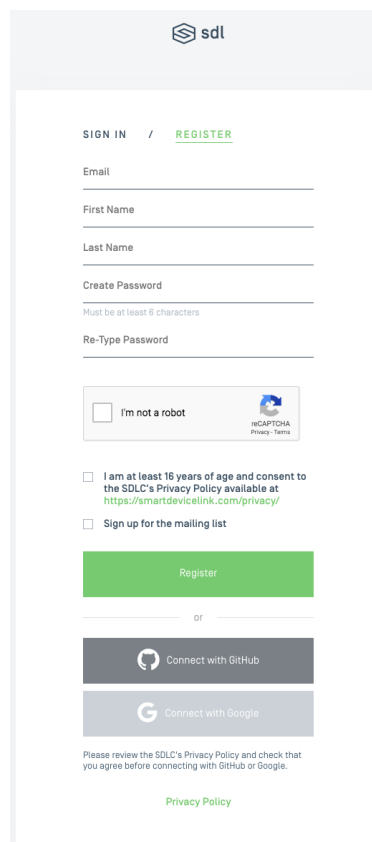

In order to register an application on the SDL developer portal, you must first create both a developer and company profile.

Developer Profile Registration

To create a developer profile, click the user icon in the top right corner of <https://smartdevicelink.com/>. This is the same icon you'll click to log in upon future visits.

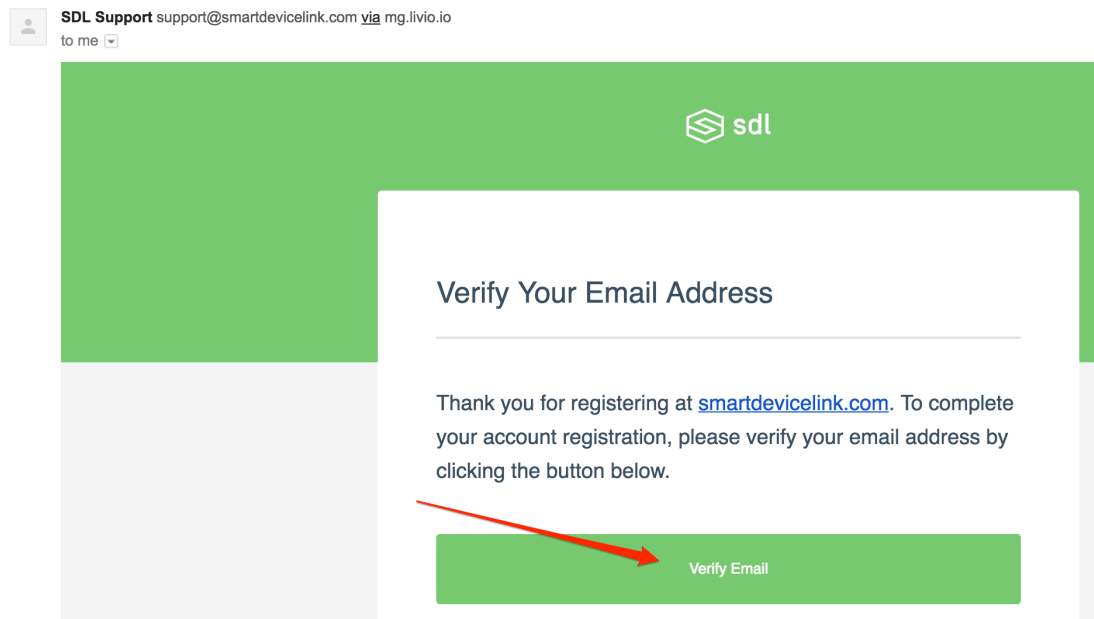

Register by completing the form, or connecting via your GitHub or Google account.

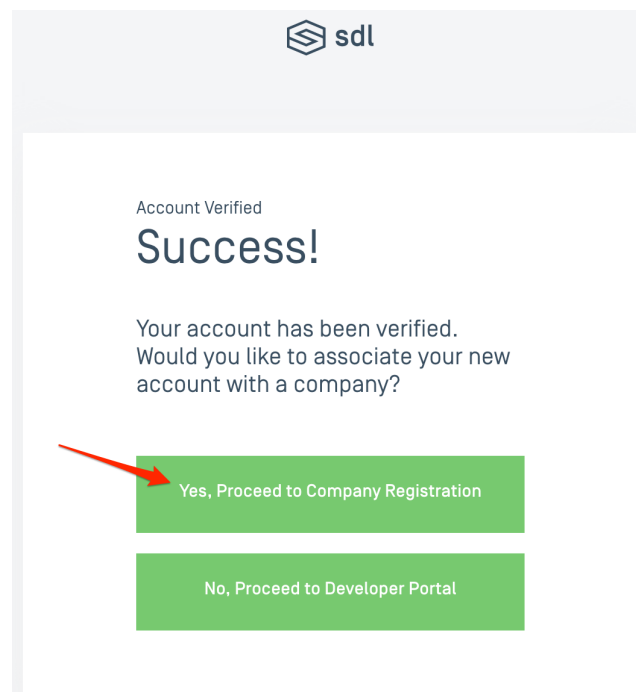

After completing the form, you will receive an email from support@smartdevicelink.com to verify your email address. You'll need to click the "Verify Email" button in order to complete developer profile registration.

Verify your email address

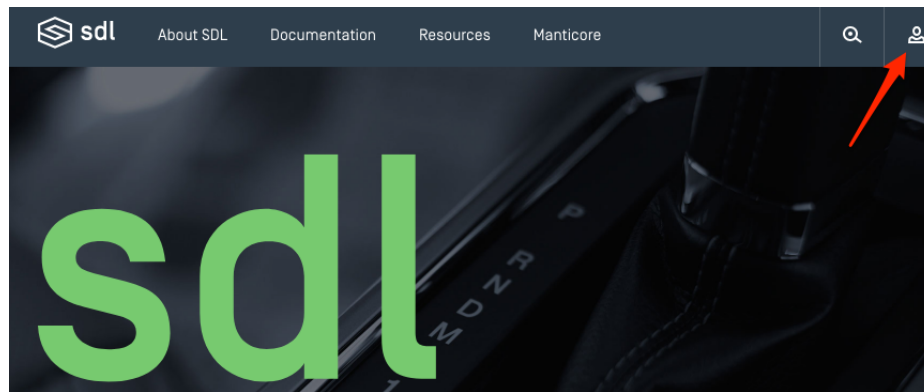

After clicking the "Verify Email" button, your developer profile has been created! You can then proceed to register a company, or access the developer portal. To register a company, click the "Yes, Proceed to Company Registration" button. Doing this will take you directly to the company registration form, described on page 4 of this guide, so you can skip the steps described on page 3.

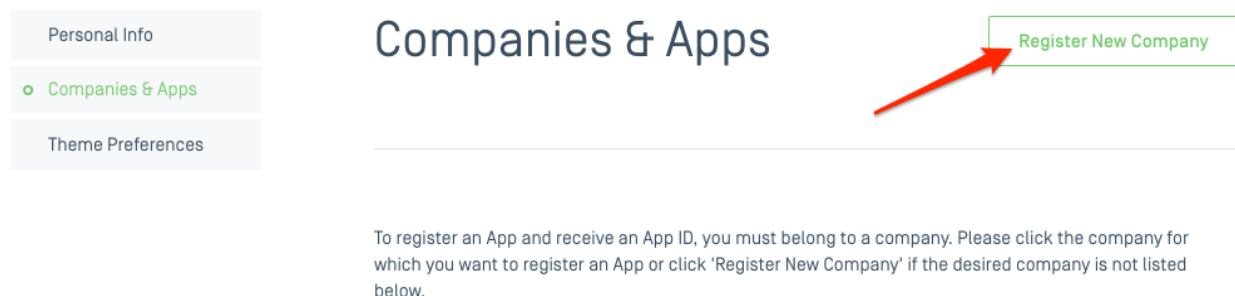

Company Profile Registration

Once your developer profile has been created, you can register a company profile at any time by clicking “Companies & Apps” in the left navigation of your developer profile. To access your developer profile, click the user icon in the top right corner of <https://smartdevicelink.com/>.

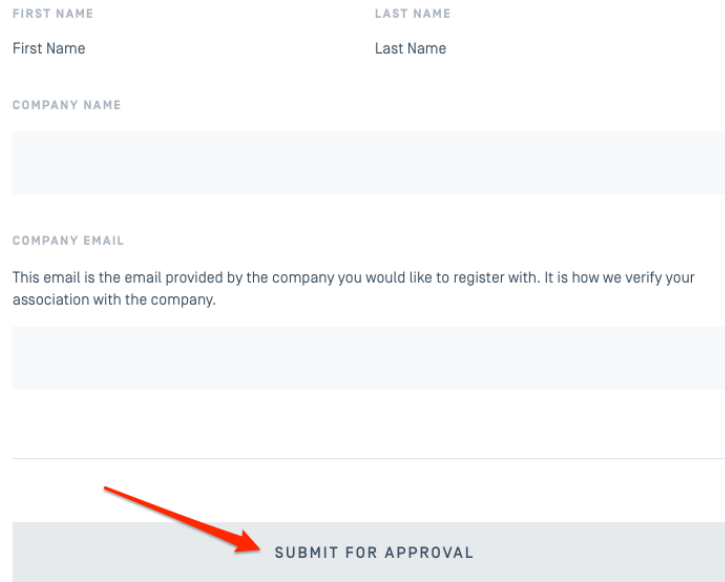

Click the “Register New Company” button to continue.

Provide your company name and company email address in the company registration form, and then click the “Submit for Approval” button.

Company Registration

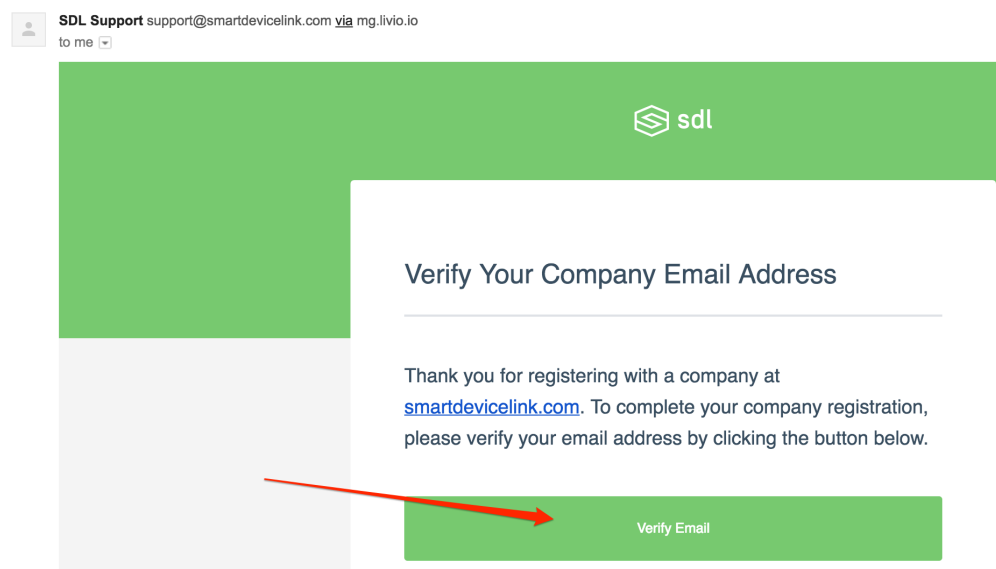

The form contains the following fields and elements:

- FIRST NAME**: Input field with placeholder text "First Name".
- LAST NAME**: Input field with placeholder text "Last Name".
- COMPANY NAME**: Input field.
- COMPANY EMAIL**: Input field with a note: "This email is the email provided by the company you would like to register with. It is how we verify your association with the company."
- SUBMIT FOR APPROVAL**: Button at the bottom, highlighted with a red arrow.

After submitting the form, you will receive an email from support@smartdevicelink.com to verify the company email address you provided. You'll need to click the “Verify Email” button in order to continue your company profile registration. *NOTE: this is only required if your company email address is different from your developer profile email address.*

Verify your company email address

The email template includes:

- Header**: SDL Support support@smartdevicelink.com via mg.livio.io to me.
- Body**:
 - SDL logo.
 - Verify Your Company Email Address**: Section header.
 - Text: "Thank you for registering with a company at smartdevicelink.com. To complete your company registration, please verify your email address by clicking the button below."
 - Verify Email**: Button at the bottom, highlighted with a red arrow.

After verifying your company email address, you will have the option to provide your job title and/or business phone number. Provide if desired, then click the “Submit for Approval” button to complete company profile registration.

Company Registration

Please complete the following form in order to register with Company Name 3

FIRST NAME

first name

LAST NAME

last name

COMPANY

Company Name 3

BUSINESS EMAIL

theresa+company_email_3@livio.io

JOB TITLE (OPTIONAL)

BUSINESS PHONE (OPTIONAL)

SUBMIT FOR APPROVAL

You'll receive a success message after submission.

Thanks!

Your request is being processed. You should receive an email shortly with your application status. Thank you for your patience.

BACK TO PROFILE

Once your company profile registration has been processed – either by the SDLC or by a member of your company if your company was registered previously – you will receive an email from support@smartdevicelink.com with the status of your application. You can also check on the status of your application by accessing “Companies & Apps” from your developer profile.

Application Registration

Once your company profile has been created, you can register applications under your company. To access your company profile, click the user icon in the top right corner of <https://smartdevicelink.com/>, then select the company to which the application should belong.

Developer Profile

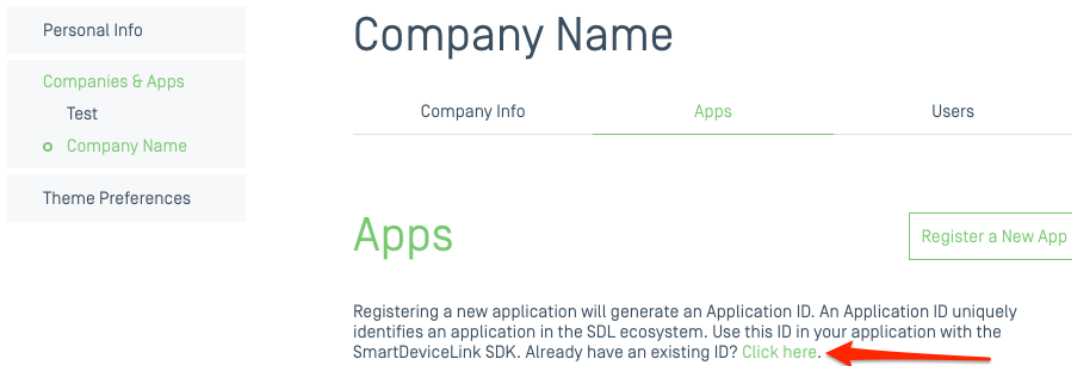

Click on the “Apps” tab in your company profile.

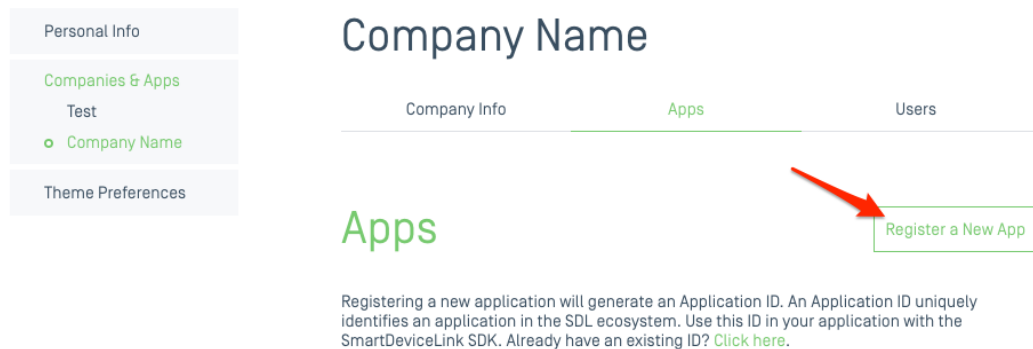

There are two different ways to register an app, depending on your situation.

If you previously registered your app via another means and already have an Application ID, click the “Click here” hyperlink in the text.

The screenshot shows the 'Company Name' page in the SDL console. The left sidebar has 'Personal Info', 'Companies & Apps' (selected), 'Test', 'Company Name' (selected), and 'Theme Preferences'. The main content area has tabs for 'Company Info', 'Apps' (selected), and 'Users'. Below the tabs, the word 'Apps' is displayed in large green font. To the right is a 'Register a New App' button. Below this, a paragraph explains that registering a new application generates an Application ID. A red arrow points to the 'Click here' link in the text: 'Already have an existing ID? [Click here](#).'

If you have not yet registered your app, click the “Register a New App” button to register your app.

This screenshot is identical to the one above, showing the 'Company Name' page with the 'Apps' tab selected. However, a red arrow points directly to the 'Register a New App' button instead of the 'Click here' link.

Please complete the form with your application information. Note that the fields marked with an asterisk (*) are required.

General App Info

APP NAME*

PLATFORM

PACKAGE NAME/BUNDLE ID*

APP NAME ALIASES*

Type in an alias in the text field below and then hit "Enter" to add it. Maximum 100 aliases.

Max 256 characters per alias.

DESCRIPTION*

If you'd like to have your application featured in the SDL App Directory, make sure you upload an app icon and check the "Allow app to be searchable in our app directory" checkbox.

SDL App Directory

By checking the box below, this app will be listed in the App Directory on smartdevicelink.com. If checked you must upload an app icon.

☐ Allow app to be searchable in our app directory

Once you've completed the form with your application information, click the "Register App" button at the bottom of the page.

REGISTER APP

You will receive a success message once the application has been registered, and be able to view your application information, including your Application ID.

Edit

Next, check the “This App is Ready for Certification” checkbox at the bottom of the page.

App Certification

☐ This App is Ready for Certification

You will be informed that once your application is submitted for certification, you will not be able to edit any of your application registration information within the developer portal. To continue, click the “OK” button.

smartdevicelink.com says

Please verify all information on this page is correct before submitting the form. Once this field has been checked and the form submitted, you will not be able to edit any of the information on this page.

OK

Next, click the “Update App” button.

App Certification

☒ This App is Ready for Certification

* indicates required field

You’ll receive confirmation that your application was updated, and your application registration form will now remain locked for editing until your application has been reviewed by the SDLC.

Additional Information

Accepting New Users

Once a company has been created, requests from new users to join the company will need to be approved by members of the company. An icon will appear next to the “Users” tab in your company profile if there are pending requests from users to join your company. To take action, click on the “Users” tab.

Next, select the user and choose to either “Approve User” or “Deny”. The user will be notified via email (from support@smartdevicelink.com) of this action.
